ELECTROPHORESIS AUTOMATED SYSTEM

42 cm

40 cm
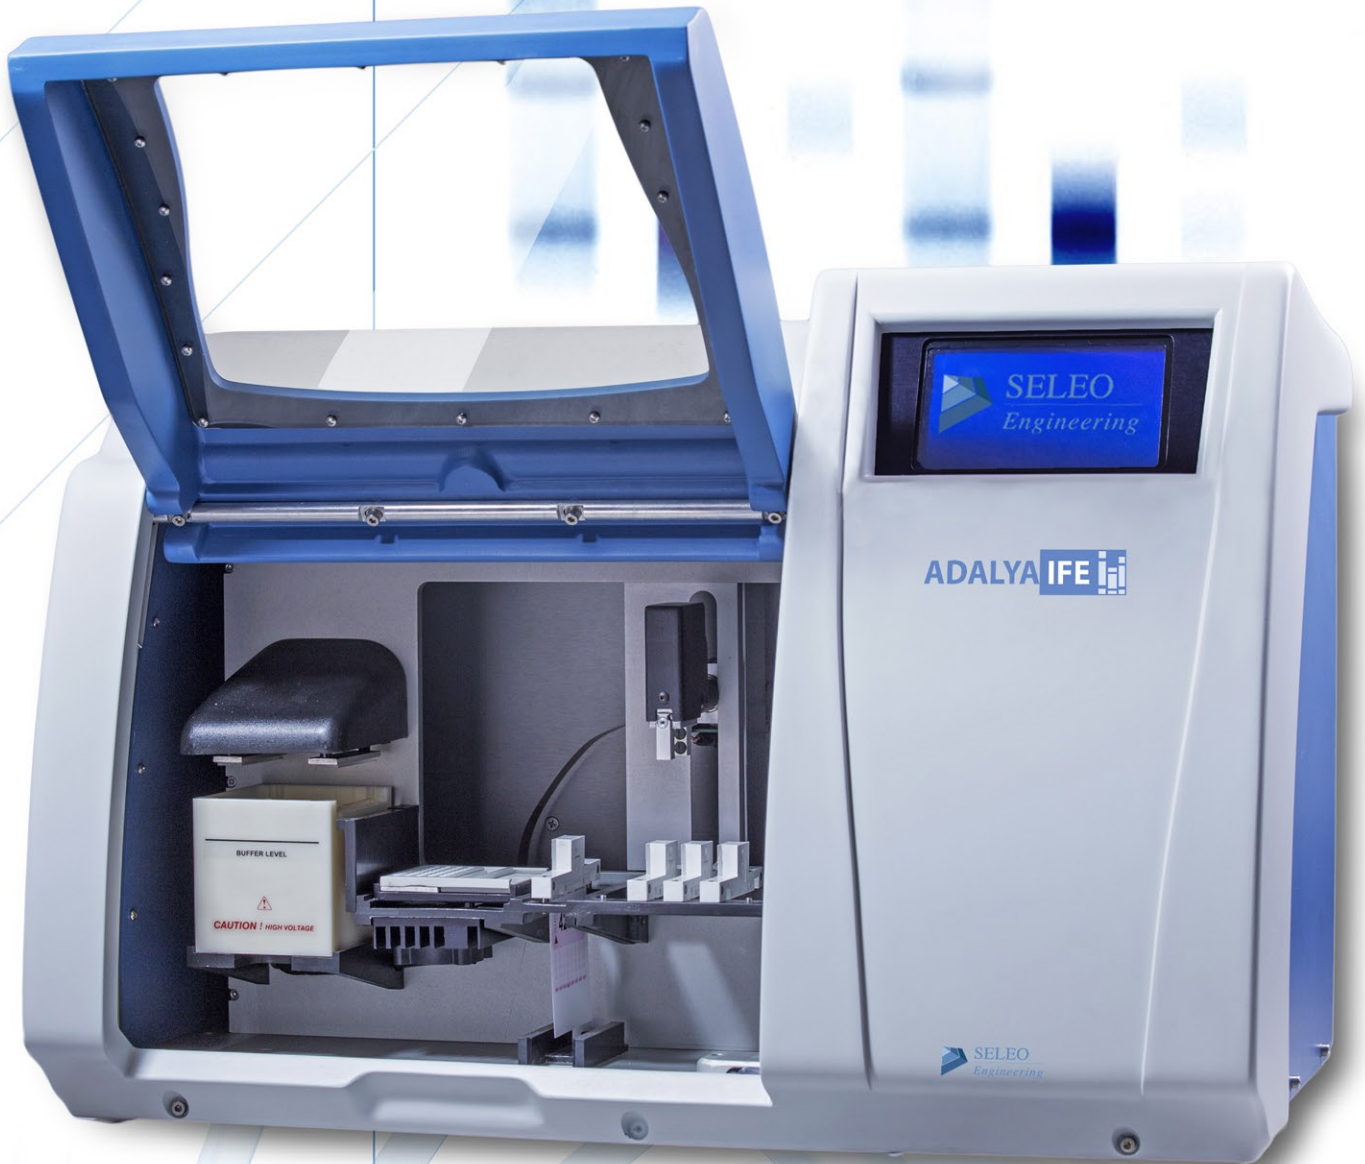

60 cm
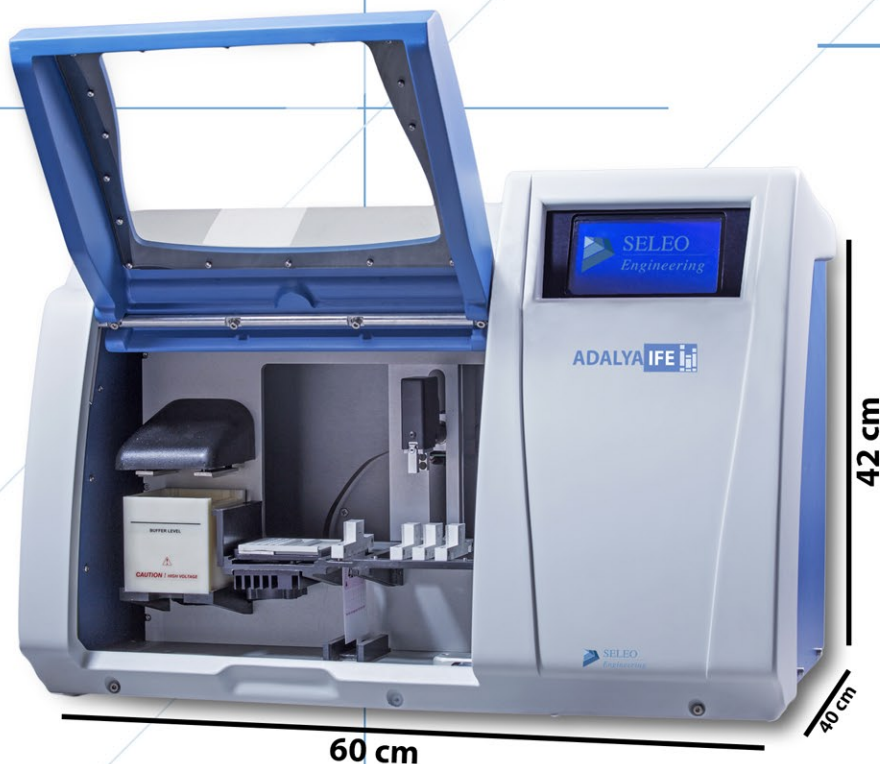

VERSATILE

Allows to perform the most common techniques: Serum proteins, Lipoproteins, Urinary Proteins, Immunofixation.

COMPLETE AUTOMATION

**AdalyaIFE automatically arranges the loading of all the reagents, to standardize the delicate electrophoretic process.**

Serum Proteins

Haemoglobins

Lipoproteins

Integrated webcam for reporting of results

Automated Ag/Ab reaction contact

PRODUCTIVITY

Serum-Proteins : 40 samples
Lipoproteins: 40 samples
Haemoglobins: 40 samples
Immunofixation: 5 samples

SOFTWARE FEATURES

User interface: monitor, keyboard and mouse
Minima recognition: automatic
Managing techniques: adjustable techniques in times, migration voltage/current
Operating system: MICROSOFT WINDOWS COMPATIBLE
